In the Sequence Listing:

Please replace the entire written sequence listing filed with the amendment dated May 23, 2006 with the written sequence listing attached to this amendment. The replacement sequence listing attached to this amendment includes all seven sequences present in the initial sequence listing filed on May 10, 2004 and an eighth sequence listing, SEQ ID NO: 8, which is the sequence listing for human androgen receptor corresponding to that in Genbank AAA51775, which was disclosed as employed in the experimental work described on page 18 of the originally filed specification.

Errors in SEQ ID NO: 8 and SEQ ID NO: 1, which were noted in the Office Action of June 26, 2006, have been corrected as well as other purely formal errors in the sequence listing filed on May 23, 2006.

Entry of the replacement sequence listing attached to this amendment is respectfully requested. It is warranted that the changes made in the sequence listing have added no new matter and are in accordance with 37 C.F.R. 1.821 and 1.825.
